TAMIRI SESHAGIRI RAO

AI / GenAI Technical Project Manager | AI Agent Solutions | Python | Snowflake | LangGraph | MCP

Hyderabad, Telangana, India | +91-9703201342 | seshutamiri@gmail.com

LinkedIn: linkedin.com/in/seshagiri-rao-tamiri-92b34222 | GitHub: github.com/seshutamiri-rgb

PROFESSIONAL SUMMARY

AI / GenAI Technical Project Manager with 20 years of experience in enterprise technology delivery, data platforms, analytics, SQL, and cross-functional technology initiatives. Hands-on experience designing and developing AI-assisted applications that combine LLMs with enterprise data, deterministic business logic, controlled tools, workflow orchestration, validation, and human-in-the-loop decision support. Developed an Agentic Data & Reporting Assistant using Python, FastAPI, Snowflake, SQL, LLMs, and n8n, and RiskLens, an AI-powered project risk management platform using Python, FastAPI, Snowflake, LangGraph, MCP, RAG, and LLM-based management explanations. Strong background in project delivery, AI program management, stakeholder management, risk management, data engineering, application development, and enterprise systems. Combining proven technology leadership with hands-on Agentic AI / GenAI application development to lead AI-driven technology initiatives from business requirements through solution delivery.

CORE COMPETENCIES

AI & Agentic AI: Agentic AI | AI Agents | Generative AI | LLM Applications | Prompt Engineering | Tool Calling | Agent Orchestration | LangGraph | MCP | RAG | Knowledge Retrieval | Human-in-the-Loop | AI Application Architecture

AI Application Engineering: Python | FastAPI | React | TypeScript | REST APIs | Structured Outputs | Workflow Design | AI Response Validation | Error Handling | AI Guardrails

Data & Analytics: Snowflake | Databricks | AWS | SQL | Data Retrieval | Data Analysis | Data Engineering | Reporting | Data Validation

Project & Delivery: Project Management | Risk Management | Stakeholder Management | Requirements Analysis | SDLC | Release Management | UAT | SIT | Quality Assurance | Cross-Functional Leadership

SELECTED AI / GENAI PROJECTS

Agentic Data & Reporting Assistant| GitHub

Technology: Python | FastAPI | Snowflake | SQL | LLM | Prompt Engineering | n8n

- Designed and developed an Agentic Data & Reporting Assistant for natural-language interaction with enterprise project and reporting data.
- Implemented a multi-step workflow to interpret management questions, generate candidate SQL, validate SQL and schema references, retrieve relevant Snowflake data, and generate management-oriented explanations.
- Integrated Snowflake and SQL for structured project-data retrieval and analysis.
- Implemented LLM-powered SQL generation with application-level validation for schema references, query structure, and controlled read-only execution.
- Implemented response parsing and structured-output validation, including handling of model response variations and validation failures.
- Implemented environment-based configuration and secret protection using external configuration, provider-neutral LLM settings, automated testing, and safe diagnostics that avoid exposing credentials.

Status: Developed and tested during hands-on project implementation; cloud deployment is not claimed.

AI-Powered Project Risk Management Platform — RiskLens| GitHub

Technology: React | TypeScript | Python | FastAPI | Snowflake | LangGraph | MCP | Project Knowledge Retrieval / RAG | LLM

- Designed and developed RiskLens, an AI-assisted Project Risk Management Platform for identifying, assessing, prioritizing, and explaining project risks.
- Built a deterministic Risk Engine using Probability × Impact scoring with configurable severity classification.
- Implemented a multi-step LangGraph workflow to orchestrate project-risk retrieval, deterministic risk validation/scoring, project knowledge retrieval, and LLM-generated management explanations.
- Implemented an MCP-based tool layer for controlled access to project-risk and project-knowledge retrieval capabilities.
- Integrated structured Snowflake project/risk data with the AI workflow and project knowledge retrieval.
- Used project knowledge retrieval / RAG to provide relevant project-specific context to the LLM.
- Designed the LLM layer to generate structured, management-oriented explanations without replacing deterministic risk calculations.
- Implemented human-in-the-loop decision support, keeping the Project Manager responsible for final risk decisions.
- Built and locally integrated the React frontend and FastAPI backend; source code maintained in GitHub.
- Implemented input validation, structured output validation, error handling, controlled MCP tool access, automated testing, and security controls for reliable AI workflow execution.

Status: Frontend/backend developed and locally integrated; cloud deployment is a planned next phase.

AWS-Powered Agile Sprint Planning AI Assistant | GitHub

Technology: React | JavaScript | AWS Lambda (Python) | Amazon Bedrock (Nova Lite) | Amazon API Gateway | Amazon Cognito | Amazon S3 | Amazon CloudFront | boto3

• Built a cloud-hosted AI-assisted sprint-planning application that accepts a sprint goal, duration, team capacity, and candidate stories and returns a generated sprint plan.

• Hosted the React frontend using Amazon S3 and Amazon CloudFront and connected the authenticated UI to the secured sprint-planning API.

• Configured Amazon Cognito authentication and an API Gateway HTTP API endpoint protected by a JWT authorizer.

• Integrated AWS Lambda with Amazon Bedrock Nova Lite using the AWS SDK (boto3) to generate a sprint plan from validated user inputs.

• Implemented backend input validation for sprint goal, team capacity, sprint duration, and candidate stories before generating a plan.

Status: Implemented and deployed as a working cloud-hosted demo. Jira/Azure DevOps integration and persistent data storage are not claimed.

PROFESSIONAL EXPERIENCE

Project Manager – Clinical Data Systems

• Led technology delivery across clinical data, analytics, validation, and platform modernization initiatives, building a strong foundation for data-driven application delivery and AI/GenAI transformation.

Bayer HealthCare Pharmaceuticals (via Cognizant Technology Solutions) | Hyderabad, India | Dec 2017 – Aug 2026

- Managed clinical data validation systems and release operations for back-end edit checks within Electronic Data Capture (EDC) platforms, overseeing 50+ deployments annually.
- Led migration from Legacy DMW to Veeva CDB platform, improving system performance by 35%.
- Orchestrated adoption of Databricks analytics platform, enabling 40% faster data processing and advanced analytics capabilities.
- Coordinated SIT and UAT across 15+ clinical applications, reducing post-release defects by 30%.
- Planned and executed quarterly release schedules, achieving 98% on-time delivery with zero compliance violations.
- Mentored 30+ team members on data engineering practices, SQL optimization, and quality standards.
- Reduced production deployment errors by 20% through automated validation scripts and enhanced testing protocols.
- Optimized query performance across 50+ production reports, achieving 45% average query execution-time reduction.

Senior Associate / Associate – Enterprise Applications

S&P Global – Platts (via Cognizant Technology Solutions) | Hyderabad, India | Oct 2009 – Nov 2017

- Advanced from Associate to Senior Associate, managing enterprise applications for commodity market intelligence.
- Enhanced Platts eWindow and SME/MKT platforms, improving data processing efficiency by 28%.
- Developed Symbol Maintenance applications supporting pricing metadata and 24/7 market-data updates with 99.9% availability.
- Delivered SDLC activities including Oracle APEX and PL/SQL development, managing 30+ feature releases with 95% on-time delivery.
- Automated reporting workflows using Oracle Discoverer, reducing manual report generation time by 60%.
- Led UAT activities across multiple platforms, resolving 85% of issues pre-production and reducing post-release incidents by 22%.
- Mentored 10+ junior developers on Oracle APEX, PL/SQL, and performance optimization.
- Coordinated requirements analysis and technical design for 15+ enhancement projects.

Senior Software Developer – Enterprise Applications

Satyam Computer Services Limited | Chennai, India | Feb 2008 – Sep 2009

- Contributed to McGraw-Hill's AWIN platform, implementing analytics tagging and Web Trends integration.
- Developed Java/J2EE components for enterprise applications, improving system response time by 32%.
- Supported production deployments and maintained 99.5% application uptime across WebLogic servers.
- Implemented analytics tagging framework enabling real-time tracking of 50K+ daily user interactions.

Software Developer – Enterprise Solutions

Virinchi Technologies Limited | Hyderabad, India | Jan 2006 – Feb 2008

- Designed and developed enterprise web applications using Java, Struts, and Hibernate.
- Implemented Hibernate ORM framework, reducing database access-layer development time by 35%.

KEY ACHIEVEMENTS

- 98% on-time project delivery across major enterprise initiatives.
- 30% reduction in post-release defects through stronger validation and testing practices.
- 50+ professionals mentored across technology and delivery practices.
- 20% reduction in production deployment errors.
- 35% performance improvement through platform modernization.
- 40–45% query/application performance improvements and 60% reduction in manual reporting effort.

TECHNICAL SKILLS

AI / GenAI / Agentic AI: LLMs | LLM Applications | Generative AI | Agentic AI | AI Agents | LangGraph | MCP | RAG | Prompt Engineering | Tool Calling | AI Workflows | Human-in-the-Loop | AI Application Architecture

Programming & APIs: Python | FastAPI | TypeScript | React | Java | JavaScript | REST APIs

Data & Cloud Platforms: Snowflake | SQL | Databricks | AWS | Amazon Bedrock | Oracle | MySQL

AI / Development Tools: GitHub | GitHub Copilot | Claude | VS Code | n8n

Enterprise Technologies: Oracle APEX | PL/SQL | Java/J2EE | Struts | Hibernate | WebLogic | JBoss

Domain: Life Sciences | Clinical Data Systems | Healthcare Analytics | Commodity Market Analytics | Enterprise Applications

EDUCATION

- Master of Computer Applications (M.C.A) — Vasavi College of Engineering, Osmania University, Hyderabad | 2005
- Bachelor of Computer Science (B.Sc) — Aurora's Degree College, Osmania University, Hyderabad | 2002
